Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 February 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-27 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) 1-3, 5-7, 14 and 21-23 is/are rejected.
- 7) ☒ Claim(s) 4, 8-13, 15-20, 24-27 is/are objected to.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

This Application has been examined. The original claims 1-27 are pending. The examination results are as following.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 5-7, 14 and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tjandrasuwita et al. (US patent 5,422,654) in view of Hicok et al. (US patent 5,59,533 cited by Applicant).

Tjandrasuwita et al. disclose in figure 4 that a video controller (c) for interfacing a frame buffer to a dual scan display (120) having a adjacent first (116) and a second display portions (114) with a display boundary there between, the video controller comprising a raster engine (including CRT, 102, 104, 112, 108, 110, and dual display 120) adapted to receive video data from the frame buffer to format the video data and render the formatted data to the dual display (see column 4, lines 47-63). However, Tjandrasuwita et al. do not disclose a hardware cursor adapted to selectively over a cursor image onto at least one of the first and second display, and first and second data paths respectively associated with the first and second display portions. Hicok et al. disclose in figures 2-3 that a hardware cursor (10) monitors the Horizontal Display Enable and Vertical Display

Enable lines (see column 5, lines 59-65). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to implement the teachings of using the hardware cursor as taught by Hicok et al. onto the first and second display as taught by Tjandrasuwit et al. because this would provide the changing of the pixel value to make the cursor appear on the video display monitor without requiring the video controller software to perform the data manipulations and transfers for the cursor.

Allowable Subject Matter

4. Claims 4, 8-13, 15-20, and 24-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

None of the cited art teaches or suggests that a video controller for interfacing a frame buffer to a dual scan display, wherein the hardware cursor comprises a first portion of the cursor image into the first data path of the raster engine according to the comparison of the first vertical counter value with the first cursor start address and the first cursor portion height value and the comparison of the horizontal counter value with the cursor column start value and the cursor image width value, or the first portion of the cursor image comprises comparing a first vertical counter value in the raster engine with a first cursor start address and a first cursor portion height value in the hardware cursor; and comparing a horizontal counter value in the raster engine with a cursor column start value and cursor image width value in the hardware cursor as now claimed.

Response to Amendment

5. Applicant's argument filed on 2-19-03 has been fully considered but they are not persuasive.

Applicant argues that neither Tjandrasuwita et al. nor Hicok et al. teaches a video controller for dual scan display comprising a hardware adapted cursor onto the first and second display portions. However, this argument is not persuasive due to the teaching of combination of Tjandrasuwita et al. and Hicok as disclosed above (see column 5, lines 59-65 of Hicok). Therefore, this rejection is maintained.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
